PROFESSIONAL SUMMARY

Lead iOS Developer with 12+ years total and 10+ years architecting scalable native iOS applications in Swift/Objective-C. Leading iOS on Banco Sabadell (millions of users); previously built real-time IoT/BLE healthcare SDKs at Tech Mahindra. Expertise in UIKit, SwiftUI, MVVM, VIPER, Clean Architecture, SOLID, modern concurrency, SDK design, and AI-assisted iOS development.

CORE SKILLS

Languages: Swift, Objective-C

iOS UI: SwiftUI, UIKit, Auto Layout, Programmatic Auto Layout, Storyboards, Core Animation

Concurrency: Swift Concurrency (async/await, actors, Sendable), Combine, GCD, Operations, Reactive Programming

iOS Frameworks: Foundation, CoreBluetooth, CoreData, MapKit, AVFoundation, UserNotifications (APNs), BackgroundTasks, Observation (@Observable)

Architecture: MVVM, VIPER, Clean Architecture, MVC, SOLID Principles, Dependency Injection, Modularization, Multi-module iOS, SDK Architecture

Security: Keychain Services, Biometric Authentication (FaceID/TouchID), Certificate Pinning, OAuth 2.0, JWT, App Transport Security

Networking: URLSession, Alamofire, REST APIs, JSON Parsing, Third-party API Integration

Testing: XCTest, XCUITest, Swift Testing, UI Testing, TDD

Monitoring & Observability: Firebase, Instabug, Tealium iOS, Google Analytics, Crash Reporting

Localization: Localization (l10n), Internationalization (i18n), Multi-language Support

SDK Distribution: Swift Package Manager, CocoaPods, XCFramework

Developer Tools: Xcode, Instruments (profiling), App Store Connect, TestFlight, SwiftLint, SwiftFormat

CI/CD & Version Control: Jenkins, GitHub Actions, Git, Bitbucket, GitHub, SourceTree

Process: Agile, Scrum, Kanban, JIRA, Confluence

AI-Assisted Development: Claude, GitHub Copilot, Cursor, Prompt Engineering

PROFESSIONAL EXPERIENCE

Banco Sabadell

Mar 2024 – Present

Lead iOS Developer

Bengaluru, India

- Lead iOS engineer on the Banco Sabadell enterprise banking app (millions of users); architected a reusable MVVM/SOLID UIKit/SwiftUI component library adopted by 4 teams (~40% screen build time reduction); owned VIPER navigation and authentication flows; mentored 2 juniors and led code reviews.

Tech Mahindra

Oct 2018 – Jan 2024

Senior iOS Developer

Bengaluru, India

- Architected and optimized high-performance real-time data streaming pipelines for healthcare IoT/BLE medical devices using CoreBluetooth, AVFoundation, GCD, and Operations; handled 100 concurrent device streams with low end-to-end latency through careful concurrency, buffer management, and memory optimization.
- Designed reactive data flow architectures using SwiftUI and Combine for streaming device data to UI and backend services; configured Background Modes for persistent device communication.
- Designed and built reusable iOS SDK modules with versioned public APIs, distributed via Swift Package Manager and XCFramework — adopted by 2 internal product teams with defined API contracts and documentation.

Farshore Partners

Aug 2014 – Aug 2018

Software Engineer

Bengaluru, India

- Worked in Objective-C and transitioned to Swift, contributing to dynamic restaurant applications across iPhone and iPad form factors.

- Worked with essential iOS frameworks including MapKit, Core Data, and Core Animation.
- Utilized advanced drawing techniques (UIBezierPath, CAShapeLayer) for visually rich layouts and custom UI components.

PROJECTS

Banco Sabadell App [View on App Store](#)

Banco Sabadell

- Architected and developed enterprise banking application using modern iOS technologies, deployed to millions of users.
- Led cross-functional collaboration to deliver scalable financial features end-to-end; integrated banking APIs and implemented robust local data management and Universal Link deep-link flows.
- Designed for performance, stability, and reliability across millions of daily active users; optimized startup time, memory usage, and network layer.

Tech Stack: Swift, Objective-C, UIKit, VIPER, Storyboard, Universal Links

Instrument Set Tracker

Enterprise App · Tech Mahindra

- Engineered a real-time data streaming pipeline using AVFoundation, Combine, and CoreBluetooth — continuous device communication, local buffer management, and concurrent data streams from multiple sources; designed for low-latency, fault-tolerant operation.

Tech Stack: Swift, SwiftUI, Combine, Swift Package Manager, CoreData, CoreBluetooth, AVFoundation

Q Restaurant Suite [Q Host](#) | [Q Waitlist Guest](#)

Farshore Partners

- Developed Q Host — a Swift application for restaurants optimizing waitlist management — and Q Waitlist Guest, a companion customer-side app for locating restaurants and joining waitlists from a map view.

Tech Stack: Swift, UIKit, Core Data, UIBezierPath, TDD, Auto Layout

PERSONAL PROJECTS

Life in the UK Test 2026 — Pro [View on App Store](#)

Personal Project

- Built and published Life in the UK Test 2026 — Pro on the App Store, a SwiftUI citizenship-test prep app with 20 practice tests, spaced repetition, flashcards, and a 15-chapter study guide reader.
- Architected with MVVM (@Observable ViewModels), SwiftData for offline-first persistence, and a Firebase-backed content pipeline (Firestore, Remote Config, Analytics) with encrypted local caching.
- Implemented StoreKit 2 in-app purchase, WidgetKit home screen widgets, and App Intents/Siri shortcuts; automated testing and TestFlight releases end-to-end with Fastlane.

Tech Stack: Swift, SwiftUI, Firebase, Fastlane

NetworkKit [View on GitHub](#)

Open Source

- Built and published NetworkKit, an open-source SPM network layer with a protocol-based, injectable API supporting Combine, async/await, and closures with strict concurrency (Sendable); 15+ stars, listed on the Swift Package Index.

Tech Stack: Swift, Swift Package Manager, Combine, Swift Concurrency

SPEAKING & COMMUNITY

- Conference Speaker — do iOS Conference, Netherlands ("Swift Concurrency 6.2"); AiDash ("Getting Started on The Composable Architecture"); plus tech meetups on AI-Powered iOS Development workflows (Figma to SwiftUI, Research Paper to iOS App, AI-Powered Pull Requests).
- Co-organizer — Swift Bengaluru (SwiftBLR) Meetup. Host — SwiftPublished podcast (YouTube).
- Author — technical articles on Medium and Swift Published.

EDUCATION

B.Tech, Electronics and Communication Engineering

2008 – 2012

Kalasalingam University
